

Premium Flex Wakeboards 2020

Goodboards is an owner-managed company. It is a boardsport brand from beautiful Ammersee (near Munich). We are looking at a longterm and stable development rather than just at a quick return on investment. We develop and manufacture our products in small series. We do this where we live with our families: in Europe. We combine our ideas based on the wishes of our team, dealers and customers. We use the highest quality materials to produce powerful and long-lasting boards. Our production is based on pre-orders with an additional 20 % for subsequent deliveries throughout the season. Our products are sold exclusively by competent specialized shops. With a selective product line we ensure stable prices and avoid mass distribution. Dealers and customers test our boards for more than 120 days a year. They provide us with valuable feedback which inspires us to improve further. What drives us is the profound belief in the original spirit of wakeboarding and our customer's enthusiasm in our products.

piece			

The anti-chop technology makes the SNAKE a particularly comfort-oriented kiteboard. The wavy sidecut easily cuts through troubled water, making it noticeably gentle on the knee and the joints. This unusual shape extends the effective edge, the smoothness is increased, while the SNAKE turns easier and generates less water. With the highest quality materials and a sophisticated construction, all kiteboards from our collection are very durable and powerful.
