

## GOODBOARDS

Seit 1989 entwickeln, produzieren und vertreiben wir Snowboards. Mit dieser Erfahrung haben wir 2010 unsere eigene Marke goodboards gegründet. Unser Firmensitz liegt zwischen München und den Alpen, am schönen Ammersee. Wir haben uns als Boardsportspezialist für hochwertige Snowboards, Wakeboards und Kiteboards etabliert.

**Der Slogan – JOIN THE GOOD WAY – beschreibt die Firmenphilosophie von goodboards und das besondere Lebensgefühl in unserer Region.**

Wir arbeiten selbstbestimmt mit der Professionalität der Großen, aber mit dem Herzblut der Kleinen. Als inhabergeführtes Unternehmen müssen wir nicht schnell, sondern können nachhaltig wachsen. Bei der Entwicklung werden unsere Vorstellungen mit den Wünschen von Teamfahrern, Händlern und Endverbrauchern kombiniert.

Als wir im Frühjahr 2010 die Firma goodboards gegründet haben, stand nicht die Ökobilanz im Vordergrund, sondern unser Wunsch leistungsstarke Bretter für den ultimativen Fahrspaß zu bauen. Durch die Langlebigkeit der Boards mit den kurzen Transportwegen, schlugen wir unbewusst von Anfang an einen umweltschonenden Weg ein.

Die Premiumprodukte werden mit Liebe zum Detail, regional in europäischer Handarbeit produziert und über inhabergeführte Fachgeschäfte vermarktet. Wir und unsere Kunden bevorzugen zeitlose Holzdesigns, die in den letzten Jahren mit 6 Design-Awards ausgezeichnet wurden. An 180 Testtagen pro Jahr, hat man vor dem Kauf die Möglichkeit, mit einer kompetenten Beratung die verschiedenen goodboards zu testen.

Wir hoffen für die Zukunft, dass sich mehr Menschen vor dem Kauf Gedanken machen, wo und unter welchen Bedingungen Ihr neues Lieblingsspielzeug produziert wird.

### ENGLISH

We have been developing, producing and selling snowboards since 1989. With this experience, we have founded our own brand goodboards in 2010. Our company headquarters is on the beautiful lake Ammersee, which lies between Munich and the Alps. We have established ourselves as a board sports specialist for high-quality snowboards, wakeboards and kiteboards.

**The slogan - JOIN THE GOOD WAY - describes the company philosophy of goodboards and the special attitude towards life in our region.**

We work independently with the professionalism of the big ones, but with the passion of the little ones. As an owner-managed enterprise we do not have to grow quickly, we can grow sustainably, environmentally friendly and healthy. During development, our ideas are combined with the wishes of team drivers, dealers and end users. By using highest quality materials, goodboards are made-to-last and offer maximum performance paired with a lot of driving fun.

When goodboards was founded in the spring of 2010, the focus was not on the ecological balance or an ecological footprint, but only on the desire to build good boards. In the fast-moving throwaway society, we wanted to take a different, sustainable path out of conviction. We simply wanted to develop high-performance and durable boards for snowboarders for whom these facts are more important than marketing campaigns from other brands. We didn't really realize that long-lasting boards that are produced with short transport routes are one of the most important contributions to environmental protection.

The premium products are produced with attention to detail, regionally handmade in Europe and marketed through owner-managed specialised stores. We and our customers prefer classic wood designs which have already received 6 design awards in recent years. On 180 test days per year, you have prior to buying the possibility to personally test various goodboards accompanied with competent consulting.

We hope for the future that more people will consider before buying about where, under what conditions and how sustainably their new favorite toy is being produced.

## ECOLOGICAL PREMIUM MATERIALS

GRAPHITE BASE

**Gesinterter Graphit Belag** – ist härter und damit robuster, nimmt wesentlich mehr Wachs auf und besitzt hervorragende Gleiteigenschaften durch geringere Reibung.

### ENGLISH

**Sintered graphite base** - is harder and therefore more robust, absorbs much more wax and has excellent sliding properties due to less friction.

BASALT

**Basalt** – ist ein natürlicher Rohstoff aus vulkanischem Gestein. Es besitzt eine bessere Zug- und Druckfestigkeit als Glas, ist aber elastischer als Karbon. Basalt dämpft die Vibrationen, macht die Boards leichter und reaktionsschneller.

**Basalt** - a natural raw material from volcanic rock. It has better tensile and compressive strength than glass, but is more elastic than carbon. Basalt dampens the vibrations, makes the boards lighter and more responsive.

DOUBLE WOOD CORE

**Kombi Holzkern** – in den Stresszonenbereichen, bei Inserts und Kanten, verwenden wir ein zähes und robustes Holz das schonend mindestens ein Jahr lang an der Luft trocknet. Zwischen den Stresszonen liegt ein sehr leichtes Holz.

**Combi wood core** - we use tough and robust wood that gently dries in the air for at least one year in the stress zone areas such as inserts and edges. A very light wood then lies between the stress zones.

JOIN THE GOOD WAY

Our slogan describes Goodboard's company philosophy and the special attitude towards life in our region.

German and owner-managed company based on the beautiful lake Ammersee

Joint development with end users, dealers and team riders

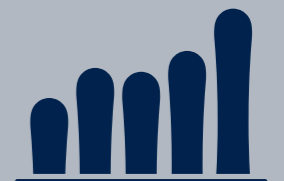

Ecological premium materials for a positive ecological balance, more performance and durable boards

European handcraft and limited series with fair wages, short transport routes and an optimal balance between supply and demand

180 tests per year with competent advice and a recommendation from the shops

Sustainable growth and level of awareness through numerous tests and word of mouth

Selective sales through local specialist shops that live, love and promote these sports

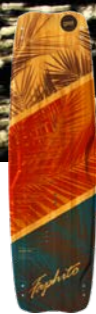

For the future, we hope that more people will take into consideration where and under what conditions their favorite toys are being produced prior to buying them
