Goodboards are ecological, powerful and durable boards because we use premium materials and produce in Europe.

We have been developing, manufacturing and selling snowboards since 1989. With this experience we founded our own brand goodboards in 2010. Our head office is on the beautiful lake Ammersee, which lies between Munich and the Alps. We have established ourselves as a board sports specialist for high-quality snowboards, wakeboards and kiteboards.

The slogan - JOIN THE GOOD WAY - describes the philosophy of goodboards and the special attitude towards life in our region.

As an owner-managed company, we don't have to grow quickly, we can grow sustainably. Throughout development, our ideas are combined with the wishes of team riders, dealers and end users.

When we founded the company goodboards in the spring of 2010, the focus was not on the ecological balance, but on our desire to build high-performance boards for the ultimate driving pleasure. Due to the longevity of the boards with short transport routes, we unconsciously took an environmentally friendly route from the start.

The premium products are produced with attention to detail by experienced craftsmen, handcrafted regionally in Europe and marketed through local specialist shops. We and our customers prefer timeless wooden designs. These have received 6 design awards in recent years. On 180 days a year - prior to purchasing - you have the opportunity to try out the various goodboards on our test stand with competent advice.

Start up is a robust beginner rental wakeboards for an easy start and those first few rounds & days. Start up has an ultra durable woodcore & sidewall construction combined with high volume aircloud boxes.

## START UP TWIN

**use**  
Beginners for the first starts and first runs

**flex**  
Flex stiff

**channels**  
  
- Twin tip for easy handling

size	136	146	156				
piece							

## START UP DIRECTIONAL

**use**  
Beginners for the first starts and first runs

**flex**  
Flex stiff

**channels**  
  
- Directional Shape with stable flat rocker

size	136	146	156				
piece							

### Advantages for cables and customers:

- sintered slider base, ABS sidewalls, quadraxial fiberglass and wood-aircloud-core ensure a durable construction
- high volume aircloud in wood core give the boards more volume, which is very important for a successful start
- due to the flat construction the center of gravity is lower and the ride is more stable
- ABS sidewall ensures an optimal edge in the water and easy passage while carving
- start up guarantees fast learning and more fun

obstacles and more

**flex**  
center stiff, tip and tail soft

**channels**

**new**  
new stance

size	140	144	148	152
piece				

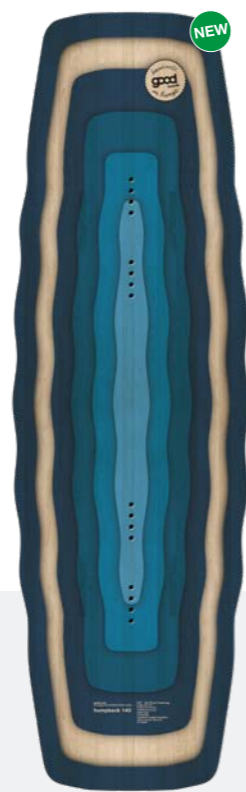

This INSANE board is a great new addition to our collection. Designed especially for air tricks and features. The somewhat smaller outline supplies the board with unbelievable manoeuvrability. With the help of a stiffened core and a completely new channel system your inverts are going to become a lot more controlled and therefore higher. Because of this core and channel combo it is also going to make those landings feel as though you were landing on a cloud. We have however not forgotten about those beloved features. With a softer tip and tail those nose and tail presses are as easy falling on your ass.

wakestyle with less rocker

**core**  
wood-glass-carbon

**size**  
143, 146

**rocker**

size	143	146
piece		

100% wakestyle with the comfort of a freestyler. Whether on the wakeboard cable or on the kite, the Humpback is your reliable partner - thanks to the thick slider base! The great genes inherited the humpback from the DUDE, a little more softer flex and less rocker, that's all you needed! Equipped with the one and only one **ACT\*** (Anti-Chop-Technology), you've a radical Wakesytlr that playfully slices through small waves and choppy water but gains massively high. A well-paced edge allows you to have unlimited pop, the 5.5 cm rocker let control you even the hardest landing's, a quick and easy angle allows you to focus completely on the kite. Thanks to the double line inserts you'll have the choice to mount Boots or Pads/Straps!

**rocker**

size	138	142	146	150	154	160
piece						

The Wipe is a playful park-junky in sizes: 138, 142, 146, 150 and 154cm. The robust construction with a thick base, a double-wood-core and strong ABS sidewalls means the board can take a beating and a long life expectancy. The wider shape allows for greater buoyancy and therefore guaranteed stability in those landings. The base is straight up flat, smooth and fast. The flex comes from the middle and gets softer towards the nose and tail giving the board a pure jibber feel.

**rocker**

size	135	139	143	147	152		
piece							

We have completely revised the medium-hard Fortuna and made it a new star in the all-round sky. Beginners can make rapid progress very comfortably and top riders benefit from the new, sophisticated features. The simple, summery design stands for a holiday feeling and the new outline for a smooth riding experience. Four slightly deeper channels under the binding provide easy guidance on the water and absolute safety when landing. The middle of the board, as well as the nose and tail are completely flat resulting in better gliding and pressing on the obstacles. The catch free edge is beveled which makes turning on the water surface and obstacles easier. New tricks can easier be tried out and perfected. Shredding with the new Fortuna provides a feeling of secure freedom - „Nothing is better than Fortuna.“

## SNAKE

**use**  
freeride

**core**  
wood-glass-carbon

**flex**  
soft

**size**  
131/39, 137/41.4, 141/42.6

**channels**

**rocker**

**weight**  
131 cm - 2,3kg, 137 cm - 2,5kg, 141 cm - 2,6kg

size	131/39	137/41.4	141/42.6
piece			

The anti-chop technology makes the SNAKE a particularly comfort-oriented kiteboard. The wavy sidecut easily cuts through troubled water, making it noticeably gentle on the knee and the joints. This unusual shape extends the effective edge, the smoothness is increased, while the SNAKE turns easier and generates less water. With the highest quality materials and a sophisticated construction, all kiteboards from our collection are very durable and powerful.

## AMNESIA PRO

**use**  
freeride/freestyle

**core**  
wood-glass-carbon

**flex**  
medium

**size**  
136/41,4, 140/42,6

**channels**

**rocker**

**weight**  
136 cm - 2,6 kg, 140 cm - 2,7 kg

size	136/41,4	140/42,6	
piece			

Amnesia Pro is the newest offspring in our kiteboard series. It was further developed on the basis of our previous bestseller "Amnesia", that is to say around the edge of the wave like our previous year's Snake model. The board is intended for riders looking for the performance of a freestyle board and the comfort of a freerider. It's an incredibly versatile board. Tip and tail are reinforced with carbon. In combination with the tube channels and sophisticated underwater hull with long lateral channels, the board provides you with excellent grip for jumps and stability on hard landings. The wave-shaped outline extends the effective edge and cuts through choppy water with ease, making it incredibly smooth and easy to turn.

## BOOMTAG IS AN NFC CHIP THAT IS FIRMLY LAMINATED INTO OUR BOARDS.

Hey there responsible rider.

It happens.. sometimes, you get separated from your gear during a great session or during a quick snack at lunchtime. The integrated NFC boomtags in the 2022 Goodboards allow a finder to reach out and get it back to you. Lost. Scan. Found and returned like a boomerang.

Scan the NFC boomtag with a smartphone to register, and the board with all its specifications is added to your free boomtag-account. Your contact details are available but locked behind our gateway, respecting and protecting your privacy. Because the boomtag is integrated, it is virtually indestructible, and it looks a lot better than handwritten phone number with a waterproof marker (which isn't waterproof anyways).

It makes it difficult for your board to be stolen or used by a not-so-honest finder, because the registration cannot be transferred to another account without your consent.

Anyone with a recent model smartphone can scan this NFC boomtag to notify you when your board is found or contact any of your emergency (SOS) contacts when something has happened to you. The possibility to contact you will help prevent unnecessary searches by Search and Rescue companies after finding your kiteboard. This allows them to focus on what they do best: saving people's lives.

Boomtag is a Lost. Scan. Found, anti-theft and safety feature. Although it creates a strong bond between you, your product, and your favorite brand, boomtag is not in the spamming business. You are in total control of the level of communication with your favorite brands.
