JOIN THE GOOD WAY

COLLECTION 2023 KITE

Goodboards sind ökologische, leistungsstarke und langlebige Boards, da wir hochwertige Materialien verwenden und in Europa produzieren.

Seit 1989 entwickeln, produzieren und vertreiben wir Snowboards. Mit dieser Erfahrung haben wir 2010 unsere eigene Marke goodboards gegründet. Unser Firmensitz liegt zwischen München und den Alpen, am schönen Ammersee. Wir haben uns als Boardsportspezialist für hochwertige Snowboards, Wakeboards und Kiteboards etabliert.

Der Slogan – JOIN THE GOOD WAY – beschreibt die Firmenphilosophie von goodboards und das besondere Lebensgefühl in unserer Region.

Bei der Entwicklung werden unsere Vorstellungen mit den Wünschen von Teamfahrern, Händlern und Endverbrauchern kombiniert. Als wir im Frühjahr 2010 die Firma goodboards gegründet haben, stand nicht die Ökobilanz im Vordergrund, sondern unser Wunsch leistungsstarke Bretter für den ultimativen Fahrspaß zu bauen. Durch die Langlebigkeit

der Boards mit den kurzen Transportwegen, schlugen wir unbewusst von Anfang an einen umweltschonenden Weg ein.

Die Premiumprodukte werden mit Liebe zum Detail, regional in europäischer Handarbeit produziert und über inhabergeführte Fachgeschäfte vermarktet.

Goodboards are ecological, powerful and durable boards because we use premium materials and produce in Europe.

We have been developing, manufacturing and selling snowboards since 1989. With this experience we founded our own brand goodboards in 2010. Our head office is on the beautiful lake Ammersee, which lies between Munich and the Alps. We have established ourselves as a board sports specialist for high-quality snowboards, wakeboards and kiteboards.

The slogan - JOIN THE GOOD WAY - describes the philosophy of goodboards and the special attitude towards life in our region.

Throughout development, our ideas are combined with the wishes of team riders, dealers and end users. When we founded the company goodboards in the spring of 2010, the focus was not on the ecological balance, but on our desire to build high-performance boards for the ultimate driving pleasure. Due to the longevity of the boards with short transport routes, we unconsciously took an environmentally friendly route from the start.

The premium products are produced with attention to detail by experienced crafts-

men, handcrafted regionally in Europe and marketed through local specialist shops.

Goodboards, des planches écologiques, puissantes et durables car nous utilisons des matériaux haut de gamme et produisons en Europe.

Nous développons, fabriquons et vendons des snowboards depuis 1989. Forts de cette expérience, nous avons fondé notre propre marque Goodboards en 2010. Notre siège social est situé sur le magnifique lac Ammersee, entre Munich et les Alpes. Nous nous sommes imposés comme un spécialiste des sports de glisse pour des snowboards, wakeboards et kitesurfs de haute qualité.

Le slogan - JOIN THE GOOD WAY - décrit la philosophie de Goodboards et notre mode de vie dans notre région.

Tout au long du développement, nos idées sont combinées avec les souhaits des riders, des détaillants et des consommateurs. Lorsque nous avons fondé la société Goodboards au printemps 2010, l'accent était mis sur l'équilibre écologique, mais aussi sur notre désir de construire des planches de hautes performances pour le plaisir d'un ride ultime. En raison de la longévité des planches, avec des itinéraires de transport courts, nous avons consciemment pris un itinéraire respectueux de l'environnement dès le départ.

Les produits haut de gamme sont fabriqués avec le souci du détail par des artisans expérimentés, fabriqués à la main en Europe et commercialisés dans des magasins spécialisés locaux.

BOOMTAG IS AN NFC CHIP THAT IS FIRMLY LAMINATED INTO OUR BOARDS.

Hey there responsible rider.

It happens.. sometimes, you get separated from your gear during a great session or during a quick snack at lunchtime. The integrated NFC boomtags in the 2022 Goodboards allow a finder to reach out and get it back to you. Lost. Scan. Found and returned like a boomerang.

Scan the NFC boomtag with a smartphone to register, and the board with all its specifications is added to your free boomtag-account. Your contact details are available but locked behind our gateway, respecting and protecting your privacy. Because the boomtag is integrated, it is virtually indestructible, and it looks a lot better than handwritten phone number with a waterproof marker (which isn't waterproof anyways).

It makes it difficult for your board to be stolen or used by a not-so-honest finder, because the registration cannot be transferred to another account without your consent.

Anyone with a recent model smartphone can scan this NFC boomtag to notify you when your board is found or contact any of your emergency (SOS) contacts when something has happened to you. The possibility to contact you will help prevent unnecessary searches by Search and Rescue companies after finding your kiteboard. This allows them to focus on what they do best: saving people's lives.

Boomtag is a Lost. Scan. Found, anti-theft and safety feature. Although it creates a strong bond between you, your product, and your favorite brand, boomtag is not in the spamming business. You are in total control of the level of communication with your favorite brands.

The anti-chop technology makes the SNAKE a particularly comfort-oriented kiteboard. The wavy sidecut easily cuts through troubled water, making it noticeably gentle on the knee and the joints. This unusual shape extends the effective edge, the smoothness is increased, while the SNAKE turns easier and generates less water. With the highest quality materials and a sophisticated construction, all kiteboards from our collection are very durable and powerful.

Amnesia Pro is the newest offspring in our kiteboard series. It was further developed on the basis of our previous bestseller "Amnesia", that is to say around the edge of the wave like our previous year's Snake model. The board is intended for riders looking for the performance of a freestyle board and the comfort of a freerider. It's an incredibly versatile board. Tip and tail are reinforced with carbon. In combination with the tube channels and sophisticated underwater hull with long lateral channels, the board provides you with excellent grip for jumps and stability on hard landings. The wave-shaped outline extends the effective edge and cuts through choppy water with ease, making it incredibly smooth and easy to turn.

100% wakestyle with the comfort of a freestyler.

Whether on the wakeboard cable or on the kite, the Humpback is your reliable partner - thanks to the thick slider base! The great genes inherited the humpback from the DUDE, a little more softer flex and less rocker, that's all you needed! Equipped with the one and only one **ACT*** (Anti-Chop-Technology), you've a radical Wakesytlr that playfully slices through small waves and choppy water but gains massively high. A well-paced edge allows you to have unlimited pop, the 5.5 cm rocker let control you even the hardest landing's, a quick and easy angle allows you to focus completely on the kite. Thanks to the double line inserts you'll have the choice to mount Boots or Pads/Straps!
